

M16

MARTIN 16

Martin 16

Stability, manoeuvrability, control and lively performance. The Martin 16 has a unique crossover design that offers a competitive edge while also serving as a recreational day sailor.

The Martin 16 is easily sailed single handed, but is made for two. The skipper steers using a joystick while simply controlling all lines from the helm.

Ideal for sailing schools and training clubs. Its ballasted drop keel makes it impossible to capsize. Specialized control systems make the boat accessible to sailors with any level of physical ability including high quadriplegics.

Whether you are a junior sailor or a senior, under 40kg or a heavyweight, a novice or national champion, the Martin 16 offers versatility and a whole lot of fun.

Standard Features

- ✓ White fibreglass hull and deck
- ✓ Dacron mainsail and jib
- ✓ Front seated steering
- ✓ Companion seat behind skipper
- ✓ Control lines accessible from cockpit
- ✓ Manual keel lift
